## Air-conditioning Management

Regular maintenance on the lift air-conditioner extends the life of the unit and ensures it works when needed.

To ensure the air-conditioning unit on your lift operates when required it is important to regularly clean the filters and maintain the system. Regular maintenance also extends the life of the unit and can reduce the running costs.

As air-conditioning maintenance requires safe access to the lift shaft, trusting Schindler with this task ensures it is completed as safely and efficiently as possible.

### Highlights

---

#### Reliability

- Regular maintenance of the air-conditioner extends the unit's operating life
- Keeping the unit maintained ensures it will operate automatically when needed

#### Peace of mind

- Remove the need to schedule multiple suppliers as all work is scheduled by Schindler
- All work completed by qualified technicians who can safely access and isolate the lift

#### Comfort

- Proper maintenance ensures the unit consistently maintains the desired temperature
- Regular cleaning of the filters removes bad odours from the unit

#### Benefits at a Glance

Improves reliability and life of your air-conditioner. No need to coordinate with multiple suppliers as all work is completed by qualified technicians and scheduled through Schindler.

#### Compatibility

Air-conditioner maintenance is available for all types of maintenance contracts.
