

Supplementary Service

Automatic Health Check

Regular health checks ensure that your lift is running smoothly and can notify us if there are any issues that require an extra site visit.

The Schindler Automatic Health Check regularly checks various operational parameters of your equipment. The self-test monitors your equipment 24/7 and any deviation to its correct operation is highlighted and necessary action taken.

This health check utilises the following functionality:

- Remote monitoring
- Automatic creation of visits (as required)
- Servicing hints for technicians

Highlights

Reliability

- The system can detect any potential issues and notify Schindler
- Proactive interventions can reduce the number of breakdowns

Peace of mind

- Health Check is automated and occurs monthly so there is no planning required
- An extra site visit may be scheduled if an intervention is required

Communication

- Monthly Health Check report sent directly to your inbox
- Provides an overview of the lift status including the number of trips made

Benefits at a Glance

Peace of mind in knowing that Schindler is monitoring your equipment remotely, detecting any potential issues and if required can schedule an extra visit to resolve the issues.

Compatibility

Health Check is available for all Schindler lifts installed after January 2019.
