

Supplementary Service

Deep Pit Management

Lift pit fall prevention kits are required to ensure safe entry and exit to deep lift pits for lift technicians.

A person conducting a business or undertaking, including those involved in the management and control of a workplace have obligations under the WHS Regulations to manage the risk of a fall by a person from one level to another. Under the regulations measures must be in place to provide adequate protection by providing a fall prevention device when works are being carried out at heights.

Following Schindler's detailed risk assessment, the most reasonably practical solution is to:

minimise the risk of falls so far as is reasonably practicable by providing a fall prevention device, work positioning system or a fall arrest system.

Highlights

Safety

- Regular testing of the anchor points and associated equipment
- Prevent the risk of falls from pit ladders or landings when performing maintenance or repair tasks
- Pit access kit includes a specialised self-retracting lanyard allowing a safe connection between the lanyard and a body harness

Benefits

- Ensures owner's requirements are met as per the WHS regulations
- Ensures compliance as all equipment and services comply with AS1891 series standards for fall-arrest equipment
- Minimised downtime during maintenance, repairs and breakdowns that require pit access
- Minimised the risk and injury potential associated with accessing deep lift pits

Supplementary Service Deep Pit Management

Scope of works

Deep pit management includes:

- Installation of access points
- Supply of test labels
- Annual testing of anchor points
- Annual inspection report
- Access to deep pit access kit

Investment

Activation Fee & Monthly Payment:

Site Activation Fee: \$700.00 (ex GST)

Lift Monthly Fee: \$45.00 (ex GST)

All installation and testing works to be carried out during normal business hours

Benefits at a Glance

Ensure compliance with the latest requirements, reduce the potential of injury, ongoing management and testing performed by Schindler and reduced downtime.

Compatibility

Deep Pit Management is available for all types of maintenance contracts.
