

L-FIXTURES

L-Fixtures

Main features & advantages

Car operating Panel
Flush Mounted

Modernization

Car operating Panel
Surface Mounted Mono Block (MB)

07.2009

The L-Fixtures program covers the needs for an elevator in a very extended way with a limited number of versions in order to have a costs optimization. Actually this new fixture is cheaper than the other solutions we had at disposal up to now.

One of its main advantages is the availability of a common design for all the EC directive Codes requests like handicapped, firefighter and vandal proof (class 1).

It can be used in the new installation and modernization market as well.

Product characteristics

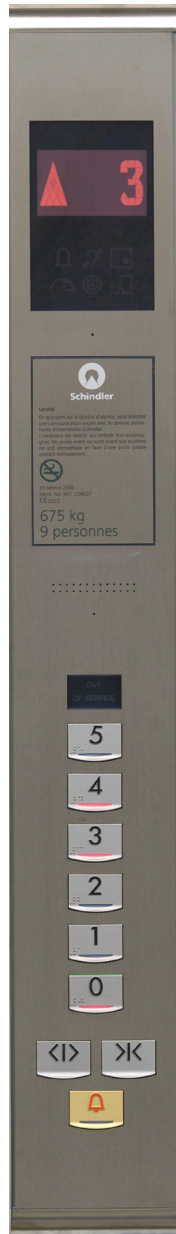

- High quality button functionality
- Optimized display visibility
- Accurate mechanical finishing
- Finishing brushed or mirror:
 - _Surface Mono Block (MB)
 - _Surface Zamac Cover (ZC)
 - _Flush clips and screw fixing
- Up to 21 floors
- Mechanical compatibility to MX and MX-Basic fixtures
