Schindler

Schindler modernization solutions

Keep passengers moving

Our passion is to use our globally renowned competencies and expertise to supply you with the very best elevator modernization solutions with minimal disruption. Our Swiss-precision engineering and proven systems increase the value of your building by improving reliability, safety, performance and the aesthetic appearance of your elevator.

Benefit from latest technologies

Our replacement elevators allow your passengers not only to enjoy a noticeably smoother, quieter operation but another level of passenger experience too, thanks to digitally enhanced mobility. Residents and tenants will appreciate the additional comfort and convenience your modernization brings to their life. Enjoy seamless mobility with no complaints.

Minimal downtime and disruption

Our global competencies and expertise ensure to minimize building adaptations and optimize the installation process when replacing your elevator, setting new standards in the field. In fact, installing our new replacement elevators requires up to 40% less time than a conventional replacement. Residents can therefore look forward to minimum disturbance and the least possible downtime, while you enjoy the benefits of a professional and hassle-free process from ordering to handover.

Improved safety and code compliance

Safety is a top priority at Schindler. Our new, modular-platform product range ensures improved safety for customers, visitors, residents and passengers. Our elevator systems meet the latest EU safety requirements and is EC type certified according to the latest regulations (New Lifts Directive 2014/33/EU, European lifts standards EN 81-20/50, European standard EN 81-21 for new lifts in existing buildings, and optionally European standard EN 81-70 regarding accessibility to lifts for persons with disabilities).

Schindler 3000 Plus

Stylish, functional and flexible

Schindler 3000 Plus is made to be flexible in every way, fitting perfectly in your building. Tailored to multiple applications in any urban environment, it will give your building a new lease of life, increasing its value and functionality. Select from a full spectrum of styles, colors and options to find the best possible match for your building.

Schindler 3000 Plus is part of Schindler's new modular-platform replacement product range for residential and commercial buildings worldwide, from low-rise to mid-rise and from basic to sophisticated requirements.

Key figures

Capacity	320–1350 kg
Travel height	Up to 70 m
Stops	Max 24 stops
Speed	1.0–1.6 m/s
Drive system	Machine-room or machine-room-less, eco-friendly regenerative drive technology, frequency controlled
Group size	Up to 6 cars
Entrances	One- or two-sided
Interior	3 interior design lines, fresh wall colors and wide range of fixtures, and bare car option

Designed to fit – built to last

Engineered to Swiss standards for 24/7 operation and to a perfect fit

Outstanding flexibility

The widest range of applications and maximum flexibility in car dimensions along with door sizes and position.

Future ready

Elevators designed to interface with next-generation technologies.

PORT Technology

Optionally, an integrated building security access solution with increased elevator efficiency and comfort.

Multiple design options

Three full design lines to complement your building interior, or choose your own design.

Designed to fit – built to last

Engineered to Swiss standards

A combination of pre-engineered components and flexibility right where it is needed ensure the best fit in existing buildings, providing smooth, quiet and economical operation. The latest technologies ensures excellent energy efficiency and minimal environment impact.

Latest technologies, greater comfort

Variable frequency drive systems deliver perfectly controlled power to traction machines and door drives, extending component lifetimes and increasing energy efficiency. Schindler Suspension Traction Media is light and long-lasting, enabling the use of smaller traction machines that reduce both energy consumption and noise and vibration levels in the car.

Developed for a perfect fit

Schindler 3000 Plus has been pre-engineered to fit in existing buildings. Flexible car dimensions optimize car size in the existing shaft, while the high variety of door types and millimeter-accurate positioning avoid the need for building works on landings. At the same time, variable shaft pit and head dimensions ensure easy adaptation and quick installation.

Innovative drive technology

Schindler 3000 Plus is equipped as standard with our innovative, regenerative drive technology. The system is designed to reduce travel energy by up to 30% compared to conventional technology.

Excellent ecological performance

Improving energy efficiency is essential to reduce the environmental impact of elevators and the buildings they serve. Eco-friendly features, such as regenerative drive, LED lighting and stand-by mode while parked, are standard in all Schindler 3000 Plus elevators, achieving the highest energy-efficiency rating class A according to ISO 25745-2.*

*The classification always refers to a specific customer configuration. Usage pattern, load capacity, customer specific options, energy saving options and site conditions influence the final rating.

Outstanding flexibility

The best use of space

Schindler 3000 Plus has outstanding architectural flexibility for car, door and shaft dimensions. Less space taken up by components means more room and comfort for your passengers.

Flexible Door Dimensions

Adaptable to any space

Avoiding changes to the landing walls and floor is highly important when replacing an elevator. Schindler 3000 Plus offers a large variety of door types and lay-outs to fit the existing space perfectly, eliminating the need for modifications and resulting in easy installation.

Door types and dimensions

The door width is adjustable in 50mm increments from 600 mm to 1400 mm, and the height from 2000 mm to 2400 mm in 100 mm increments with a choice of telescopic (T2) or center-opening doors (C2, C4) for single or double entrance (through-loading). For specific cases a flat symmetric or asymmetric C4 panel door is also available.

Metal front

Metal extension fronts combined with the landing doors are also available to partially or fully cover the landing shaft front.

Frameless landing doors

As an alternative to standard box-framed landing doors, frameless doors (which reuse existing landing frames) are also available to preserve the existing finishing of your landing.

Future ready

Schindler elevators designed for next-generation technologies

Benefit from our tools, solutions and latest innovations providing improved equipment reliability, uptime, safety and an all-new superior passenger experience. Our elevators are designed to use state-of-the-art technologies from planning to operation.

Innovation in installation

Schindler's new **INEX (Installation Excellence)** method not only reduces construction preparation and resources for our customers, it also improves safety and efficiency on site.

Digital solutions tailored to your needs

All our new elevators are fully enabled for Schindler Ahead – our digital portfolio for smart elevators. Designed on the principles of IoT (Internet of Things) and machine learning, it analyzes cloud-based data to deliver improved uptime, insights and convenience.

Smart operation – clarity and convenience

Digital connectivity allows for better maintenance and management of the equipment, while adding higher levels of comforts for passengers. With Schindler Ahead, we make sure that our customers can enjoy confidently the benefits of the digital era.

– Maximize uptime with Ahead Remote Monitoring

With digital connectivity, issues can be detected and addressed well before service is affected. This helps facilities take timely action to minimize or even avoid downtime. Schindler Ahead maximizes uptime thanks to instant, accurate insights.

– Real-time insights with Ahead ActionBoard

Ahead ActionBoard provides operational, performance and commercial information in real time, giving customers clear, instant oversight of their entire elevator and escalator portfolio.

User experience on a next level

Inform, engage, entertain. Display engaging multimedia content for your passengers and generate new revenue streams through advertising. Turn your elevator into an infotainment hub with **Ahead SmartMirror** and **DoorShow**, or transform user-elevator interaction into a unique, visual experience with the **Linea 800 SmartTouch** interactive fixtures.

With valuable information at your finger tips, preventive and predictive action can be taken faster

Navona
Functional and durable

Times Square
Modern and versatile

Park Avenue
Sophisticated and elegant

Custom design
Design your own interior

Multiple design options

Ready-made interior design lines

Navona

Functional and durable

Clarity and comfort in your car with this robust design line. Fresh colors, durable accessories, and the option of five different floors make Navona an excellent choice for residential applications. Stainless steel options are also available for rear and side walls.

Times Square

Modern and versatile

A contemporary look. Choose from warm or cool colors or combine to enhance contrast for more depth. Times Square adds distinctive features to any public, commercial or residential building.

Park Avenue

Sophisticated and elegant

A touch of class. Wooden and textured laminates or back-painted glass walls for a rich, contemporary mode. Or a luxury feel with stainless steel in seven different finishes or decorative glass. Matched lighting completes Park Avenue's elegance.

Note: Specifications, options and colors are subject to change. All cars and options illustrated in this brochure are representative only. The samples shown may vary from the original in color and material.

Freedom of design

Create the look and feel you like

Choose an elevator design that perfectly matches your building interior. Select from Schindler 3000's three décor lines and combine your choice with our range of operating panels, handrails, lighting, mirrors and other accessories.

And for full custom designs, the Schindler 3000 bare car option allows you to add up to 30% of the car's rated load capacity for the materials and finishings of your choice.

Car operating panels and landing fixtures

Outfit your elevator with style

Linea 100

Linea 100 offers functional design in stainless steel. The integrated white glass display comes with large, easily readable red LED dot matrix floor indicator. Push buttons have clear red illumination when a call is recognized.

Linea 100 EN 81-70

The durable yet stylish car operating panel (COP) and landing signalization devices are impact, scratch, splash, and burn resistant, as well as being extremely easy to clean. In addition to EN81-71, Schindler intercom and indicator systems is also compliant with the EN81-70 European accessibility standard and EN81-72 and EN81-73 fire-related standards.

Linea 300

An upmarket user interface to enhance your elevator's looks, with an intuitive, efficient design. The display is in black glass, with buttons positioned on elegant black stainless steel, or white glass display on typical stainless steel color finishing.

Barrier-free mobility

We offer a wide-ranging portfolio of special fixtures for passengers with reduced mobility. This includes easily identifiable large push-buttons with raised symbols (EN:81-70 norm) and Braille to help visually impaired and aged people in their orientation.

- 01 Full height car operating panel
- 02 Half height car operating panel
