

# Schindler CleanMobility solutions

## Schindler CleanAir Ion

Schindler CleanAir Ion cleans the air inside elevator cabins for passengers, providing continuous reduction of airborne viruses and bacteria.

### How it works

The air inside elevator cabs can harbor numerous airborne contaminants – from viruses and bacteria, to mold and volatile organic compounds.

Schindler CleanAir Ion, mounted inside the elevator cab, generates millions of positively and negatively charged ions. The integrated fan circulates the ionized air inside the cabin space, allowing the ions to disperse easily, and to attack airborne contaminants. Integrated LEDs provide supplemental cabin lighting.

Flush-mount and Surface-mount options are available, for mounting on the cab wall, inside of returns, or even in the cab ceiling.

The enclosure is available in a range of finishes:

- #4 brushed and #8 polished Stainless Steel
- #4 brushed and #8 polished Muntz Bronze
- Custom finishes on request

Schindler CleanAir Ion is designed not to require annual maintenance, and meets existing code and regulatory requirements.

#### Automatic cleaning

The system continuously cleans the air inside the cabin.

#### Elegant design

The Schindler CleanAir Ion unit is elegant and harmonizes well with any elevator interior.

#### Quick and easy

Compatible with all brands of equipment, Schindler CleanAir Ion can be installed into your elevator quickly and easily.
